Lady Luck never smiled on anyone who sits back complacently That's for sure. Lady Luck admires the man with a purpose in mind-she believes in the old proverb: "Faint heart ne'er won fair lady." She admires the man who has a definite purpose in life -who displays will power, persistence, and those qualities that enable her to be wooed successfully. Nobody who ever amounted to anything depended on carrying around a rabbit's foot in his pocket. Neither did Walter Chrysler gamble his future on a herseshoe nailed above a machine-shop door Nor did Thomas A. Edison depend upon this same rabbit's foot for his great accomplishments.

Chrysler Report

In a message to the company's 1,200 dealers across Canada on the occasion of Chrysler of Canada's 30th anniversary, E. C Row, president and general mana ger stated that 85.9 of all vehicles manbfactured by the company since 1925 are still on the high-

During this period, he added the corporation has paid out in wages and salaries more than 240 million dollars, and in excise and sales taxes to the federal government. another 217 millions.

The retail value of the 1,154,940 cars and trucks produced since 1925 was placed at approximately \$1,600,000,000.

'Chrysler of Canada, with only this brief look to the past, is marching steadily shead" Mr. Bow's message concluded. "With production, sales and payroll now at an all-time high it is appropriate that we take stock, note what we have accomplished and re-set our sights for the future."

Currently the company employes 10,000 salaried and hourly-rated workers at its main plant and offices in Windsor, its field staff and its parts plants in Chatham, ncton, N.B., Regins, Sask. and Red Deer, Alberta.

The older text books have statements like the following: Shortage causes prices to rise. Rising prices cause greater production and more areful use. Greater production and more careful use causes greater abundance. Abundance causes price declines and more consumption." If the price of any modity is fixed by law it is impossible to tell what amount of the product is needed. The American taxpayers have been paying a substantial bonous on every bushel of wheat produced. been possible because the United States is a rich country, with a

relatively small wheat production while Canada is a smaller country with a relatively large wheat pro-The C.W.L. monthly meeting duction. Wheat production with was held at St. Victor's Parish modern machinery became popular and a suge surplus has piled up. This hangs like a cloud over the market and is causing confusion and concern to wheat producers everywhere. The ultimate losses may be greater than the benefit that the bonus has broug't. Most importing countries buy their supplies through a government agency, so the exporting countries need a single selling agency to bring bargaining to one point. Farmers do not want to go back to the system where great fortunes were made by middle men who never produced a bushel of wheat. Wheat agreements among nations provide a sheltered market, but the price per bushel paid is much less than the price quoted on the various grain exchanges. The Canadian government has arranged over recent years to buy large quantities of wheat from farmers and give it to people of the world in backward countries that are starving. This policy should be continued, but the United States

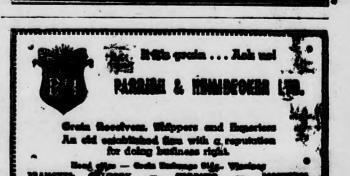

government paid their wheat pro-

ducers such a high price that great Canada was the first country quantities were produced, causing in the world to adopt the stanthe present disruption of ordinary dard time system that is now in universal use.

Human being not necessarily dead when taken from water

victims have been under water for only a short time, death has often occurred in spite of artificial respiration, while in the case of other victims under the water for a longer time, life has been restored. It has also been noted by many physicians that in many drowning cases post mortem examination has failed to discover water in the victim's

In a series of investigations car- have swallowed your drink of warled on in 1938 by the late Sir ter or tea. Frederick Banting and associates, in co-operation with the Health League of Canada, the reason for these anomalies was found. In a large proportion of cases of apparent drowning the actual cause of death is not drowning, but suffocation. A spasm of the larynx prevents either water or air from entering the lungs, and the result, although there is no water in the lungs, is death, just the same.

The closure of the larynx is in the first place protective. The aperture of the larynx closes when one takes a drink of water, or tea -to prevent the fluid going down the wrong way—into the lungs instead of into the stomach. In drowning cases, the closing of the larynx has the same objective. But as the victim becomes unconscious, the larynx often fails to open again as it does after you

An essential in the revival of apparently drowned persons is to make sure that the air passages are free. The rhythmic application of artificial respiration should result in the audible passage of air in and out-listen for it. A doctor, of course, can make sure with his stethoscope.

Delay can be fatal

Even a few minutes delay in applying artificial respiration to apparently drowned persons may make all the difference between success and failure - life and death.

The air passages must be clear. There must be no let-up in the continuous, rhythmic application of pressure and release (say 15 times to the minute).

In suitable cases artificial res-piration should be kept up for hours, until success is achieved, or rigor mortis sets in.

human being is not neces sarily dead because he has been under water for a few minutes. Even if in the water for half an hour or possibly longer, life may still be present. While there's life, there's hope.

To further interest in prevention of death by drowning, readers are asked to send any true experiences they may have had, either as a partici-pant or a bystander, in any drowning cases, to The Health League of Canada, 111 Avenue Road, Toronto

Child recovers after half hour's immersion

Many people believe that artificial respiration is useless if the victim has been under water for more than a few minutes. This true story from the Health League of Canada will prove that this is not so. On July 7, 1937, a little girl fell off a raft in Carleton Place into deep water. Two boys dived 17 times before the little body was recovered. She must have been under water for a good 20 minutes.

Two electrical workers trained in artificial respiration happened to be present, and artificial respiration was started at once. The little girl breathed in 35 minutes, and ultimately recovered.

This could have been a summer

tragedy. It was prevented by the timely appearance of the two electrical workers who knew how to apply artificial respiration, and had enough sense to keep it up. Tragedies through drowning can be prevented in many cases. Artificial respiration should be applied at once, and kept up continuously until either success is achieved, or

BAKING POWDER

Peanut Butter Pinwheel Loaf

Mix and sift into a bowl, 3 c. once-sifted pastry flour (or 2% c. once-sifted all-purpose flour), 5½ tsps. Magic Baking Powder, ¾ tsp. salt. Cut in finely 7 tbs. chilled shortening. Combine ½ c. milk and ½ tsp. vanilla. Make a well in dry ingredients and add liquids; mix lightly with a fork. Knead for 10 seconds on lightly-floured board and roll out to ½" thick rectangle, 8½" along one side. Cream together 1 tbs. butter or margarine, ¼ c. peanut butter and ½ c. lightly-packed brown sugar; sprinkle on rolled-out dough. Beginning at an 8½" edge, roll dough up like a jelly roll and place in a greased loaf pan (4½" x 8½"). Bake in a hot oven, 400°, about 45 minutes. Serve hot, cut in thick slices, or cold, cut in thin slices, lightly spread with butter or margarine.

Home Workshop

Either solid stock plywood may be used for the bot-tom and sides of this combination sand box and wading pool. Youngsters are delighted with the jolly whale at each end, for which tracing outlines and color chart are given on the pattern. A feature of this design is that the top may be raised and lowered by simply releasing the thumb screws.

This feature is provided to keep simply releasing the thumb screws. This feature is provided to keep birds out of the sand box and stray dogs out of the pool on hot afternoons when junior is taking his nap. Everything is complete on pattern 306, price 35c. This pattern 306 is included with the Outdoor Play Equipment packet of five standard size patterns at \$1.50 postnaid. \$1.50 postpaid.

What could be handier than this combination chair and step-stool for watching television, climbing into bed and using the grown-ups' lavatory. It is light for junior to carry about and well balanced for safety. By using a pattern for tracing the saw lines for the curves directly to the wood this useful project is quick and easy to make. The assembling directions are shown on the pattern with large 3-dimensional sketches. It is made entirely of wood except for a few small nails. Price of this pattern is 35c. There is also available for \$1.50 the Children's Furniture packet of five standard size patterns for bunk beds, wardrobe, lamps and small chairs.

Address order to: What could be handier than this Address order to:

Wild horses were very common in Europe during the Old Stone Age and formed an important part of the diet of the people.

Annual weed damage said \$255 million

Weeds cause an estimated annual loss to western Canadian farmers of \$255 million, according to H. E. Wood, Weeds Commis-sioner with the Manitoba Department of Agriculture.

ciety at Edmonton, Mr. Wood be held at Cambridge from July 4 to Dean Swift. said that this figure means an average cost per farm of \$1,028 a E. Haist of the University of Tor-year. The figure for Canada as a onto, Mrs. G. E. Muttart of Edwhole, meanwhile, is approximately one-third of a billion dollars yearly.

monton and Dr. E. Gray, a Canadian living in Hong Kong. This Congress is the first of its kind

These tremendous losses, Mr. Wood, include additional till- Kingdom. age costs, competition of weeds to the growing crop and lower carrying capacity of pastures. Dockage (in 1953) amounted to 300 train-loads of 55 cars each. Chemical treatment, although an invest-ment, is also an additional cost.

The weed problem is most seri-ous on the prairies, where grain growing is highly mechanized. In regions where agriculture is more diversified, weeds seldom reach the proportion they do on the prairies.

In spite of the seriousness of the situation, "let us be encour-aged by the fact that, with the tremendous advances in cultural, chemical and other weed control methods, weeds, in the main, are controllable," Mr. Wood concluded.

How to be a good sport

Pointers on being a good sport, whether you are in your teens, 20's, or much farther along. 'Sport" good manners.

1. Always play your best. No matter how far behind you are, never stop trying.

2. Be a generous opponent (slow to take advantage of a technicality in your favor, quick to give another the benefit of the doubt).

3. Take defeat gracefully.
4. Accept victory with modesty.

5. Never delay the game.6. Never display "righteous im-

patience" by whistling, tapping or moving about. 7. If you break a rule, accept

any correction immediately and gracefully with an apology.

8. Be quick to call any infringe-ment of the rules on yourself, especially one not noticed by your opponent. 9. Never criticize a partner.

10. Remember that the most like able player is the one who adapts quickly and easily to the "house rules. (This is especially pertinent right now—in summer—when you may be a guest in a far-off place.)

. The United States and Canada consume the extract from more than 40,000,000 pounds of dried licorice root each year.

Increasing wool returns

Increasing costs of sheep operations have made it imperative that sheepmen improve their efficiency of production if they are to obtain a reasonable return for their efforts. Emphasis, according to S. B. Slen, Lethbridge Experimental Station, Canada department of Agriculture, must be placed on improving the quantity and quality of wool and lamb produced per ewe, Because of competition from synthetic fibres it is especially important that the quality of wool should be improved.

During the past few years in Western Canada approximately.

strong:

BE STRONG!

Be strong:

We are not here to play, to dream, to drift;

We have hard work to do and loads to lift;

Shun not the struggle—face it; 'fis God's gift.

Be strong!

Say not, "The days are evil. Who's to blame?"

And fold the hands and acquiesce—oh shame!

Stand up, speak out, and bravely in God's name.

Be strong:

It matters not how deep intrenched the wrong, How have the shard work long:

Faint not—fight on! Tomorrows comes the song.

—M. D. Babcock

Pinwheel Loaf

We load to lift;

The marketability of most say be intreached the wrong, How have long in the holding pens should be shorn after the main band and these fleeces should be improved.

Measure to drift; we wars in Western Canada approximately of percent of the receipts from sheep have been from lambs and 30 percent from wool. In Eastern Canada the percentage contributed by lambs has been even higher. As a result more attention has been given to selection for increased lamb production than for increased wool production. However, to obtain maximum returns from wool production. However, to obtain maximum returns from wool emphasis also must be placed on this product.

The marketability of wools may be improved in two ways: (1) by improvement in the quantity, quality, and uniformity of wool wool wool and (2) by the proper preparation of wool during and after shearing.

Results from the Lethbridge Station have shown that raw fleece weight is a good index of clean wool production. It measures the combined effects of fibre fineness, staple length, and density of fibres on a given skin area. As a result, satisfactory improvement can be made on this basis. The most accurate culling can be done at shearing the storage of the surface of the surface of the surface of the storage of the surface of the surface

be packed separately.

The provision of holding pens with slatted floors may not be practical for the smaller domestic flocks. Nevertheless, all these other precautions can be observed by any flock owner.

Punch down risen dough and roll out into an 8" square; loosen dough. Spread with remaining sugar mixture and sprinkle with Dry Yeast. Let stand 10 mins.,

PEGGY JEEPERS! THAT SURE WAS A FAST RESCUE! ONLY SECONDS AFTER PEGGY I YELLED FOR HELP!

OUR COMPLETE SHORT STORY-

A slow poke speeds up

-By CHARLES CLARKSON

TARRY TIMS stood near the at the lively little brunette behind the cashier's desk. She repeated her words.

Domino chain has offered me a job her . . . you know, that I'd like as relieving cashier. I'll be travel-to see her again and all that?" as relieving cashier. I'll be travel-

ling all around."
His mouth drooped, but he managed a smile. "That sounds like a tell her yourself, Go on—what's grand job, Ann. I'm sure pleased." stopping you?"

the hurt in her eyes.

Larry started toward the show

window, changed his mind and sat down at the soda fountain. Half to himself, he said slowly, "She's leaving."

jerker, glanced over. "Who, Ann?" "I'll do it! Sure, today's her last day. She than say no." just told you?" Larry nodded

As he wen glumly.

Ginger was scornful. "Listen, pal. You fell for her the first time you came here to trim the windows. Not that I blame you. Ann's a peach of a kid—and a swell looker, too. But what do you do?" He didn't wait for an answer.
"Once a week you blow in. You
say hello. Then you spend the
time just looking at her, so that you're sticking pins into your fin-gers instead of into that colored paper you carry around. Why don't you give yourself a break?"

It's true, Larry thought sadly. All week he'd look forward to Friday, his day to do the restaurant windows. He'd plan what he was going to say—suggest calling for her after work; perhaps a drive out the parkway and a bite to eat. After that . . . well, he was sure things would work out all right.

He was pleased as he drove back to the restaurant and stopped opposite the door. It was nearly five o'clock. Ann couldn't miss seeing his message!

He settled down to wait. It all right.

But when Friday came, it was always the same. One look at those warm, smiling eyes and his courage vanished.

He tried to explain to Ginger. "You don't understand, kid. I'm not in Ann's class. She wouldn't bother with me. Besides, I don't know how to begin."

Ginger made a sour face. "Listen, chump. Just give yourself a big build-up—tell her what a great guy you are. Next thing, she's eating out of your hand."

"Not me." Larry groaned.

"She'd workship leach in your face."

"Isams by didn't help any He slumped lower in his seat.

"I'm crazy," he thought dismally. "She'll think I'm ridiculous...

"I can't go through with it," he decided desperately. "I'll go in, say goodbye sensibly, and drive

"She'd probably laugh in my face."
He went back to his work, gathering the crepe paper into fancy patterns, and pinning up the little felt letters. He glanced often to-ward the cashier, but the dark head never turned in his direction. He was ignored. He felt crushed,

By noon he was desperate. Sliddoor of the restaurant and ing into a fountain seat, he beckoned the red head toward him. "Listen, Ginger. You've got to

ated her words.
"Yes, I'm leaving, Larry. The Couldn't you talk to Ann? Tell Ginger shook his head decided-". "That's no good. You've got to

ened.

"Why don't you give her a going-away present? She's sure to be pleased. After that it's strictly up to you."

Ginger, the red-headed soda determined look grew in his eyes. "I'll do it! She can't do worse

As he went by the cashier's desk, he said, "I'll be back later." Ann didn't seem to hear.

That afternoon he decided on a plan. He bought a large box of chocolates, in the shape of a heart. It was a red box, tied with a silver ribbon. He drove to a quiet street, took out his material kit, and set to work.

First, he fastened the chocolate box against the car window. Then his quick fingers fashioned tiny roses out of crepe paper, and ar-ranged them around the box. Fin-ally, selecting felt letters from his case, he attached them to glass, spelling his message, "Good directed to the Saskatchewan Arts

He was pleased as he drove back

He settled down to wait. It seemed a long time, and he kept glancing at his watch. Fifteen minutes past five. Twenty, Twenty-

He kept looking at his handi-work, too. At first the looks were admiring. He was exhilarated, happy. Slowly, however, his mood changed. Laughs and glances from passers-by didn't help any He slumped lower in his seat.

say goodbye sensibly, and drive away before she can see this and laugh at it."

He ran across the sidewalk and through the door. Ann was nowhere in sight.

Ginger gave him a pitying look. "You're late, chum. She left ear-

"She . . . left . . . early?" he

repeated dazedly.
"Yeah. She seemed upset about something. Kept fussing around that window you worked on this morning. Finally she asked the boss if she could go home."

Larry's shoulders sagged as he turned to the show window. There couldn't be anything wrong with his display.

At first everything seemed in order. But there was somethingthe letters had been changed! He

spelled out the words. "So long, Larry," it said.

"Why," he thought wildly, "she likes me! She must . . . or she wouldn't have bothered. If only

He looked sadly out at the car. There was someone standing

She turned slowly, giving him the loveliest smile he had ever

"Larry! How wonderful! You did this for me-and I hardly

thought you knew I existed!"
"You thought . . . I didn't know
. . ." he repeated numbly. "You
mean . . ."
She made a self-effacing little
gesture. "Oh, I know there's no
veccon why you should But I

reason why you should. But I hoped that some day you'd get around to saying something more than 'good morning' to me. And today you told me you were glad I was leaving! When you didn't come back this afternoon to say goodbye. I was so upset I went home. But I had to come back, in case you did show up. You must think I'm awfully silly."

His chest seemed to swell, and there was new dignity and poise in his voice. "Not silly, Ann. I think your grand." Confidently, he leaned over and murmured, "Ann. would you like to come for a drive out the parkway, perhaps—and then go somewhere for dinner?" Ann looked up with shining eyes. "How could I say no?" she whispered. "You're so masterful!" (Copyright Wheeler Newspaper Syndicate)

Junior Art Exhibition opens Nov. 9

REGINA. - The Saskatchewan Arts Board is again sponsoring a Junior Art Exhibition opening on Wednesday, November 9, at the Norman Mackenzie Art Gallery in Regina, according to Miss Norah McCullough, Saskatchewan Arts Board secretary. This will be the fourth exhibition of its kind to be held in the province.

Miss McCullough requests art

teachers of schools, principals, and all those interested in the encouragement of art education to espe-cially take note of this fall exhibition.

Teachers are asked to retain "Oh . . . well, thanks, Larry." Ginger puckered his forehead in Ann Gales turned quickly to hide thought. Finally his face bright. this Junior Art Exhibition, since it had not been possible to have printed notices circulated before the end of the school term, Miss McCullough said. Printed notices and entry forms giving full par-ticulars will be sent out late this September. Entries should be large in size and the student's own original work. No copies will be accepted.

The exhibition will be open to anyone, whether a student or not, from 13 to 21 years of age, complying with the regulations.

Substantial prizes are being of-fered for the young people send-ing their art efforts to the Junior Art Exhibition, Miss McCullough added. Generous awards have been actions awards have been contributed by a private donor and art supply dealers, and six cash purchase prizes are offered by the Saskatchewan Arts Board, amounting to approximately \$200 in all.

Enquiries regarding the Junior Art Exhibition for 1955 should be Board, 1100 Broad Street, Regina.

SMILE OF THE WEEK

"Is your wife economical?" "Very. We do without every thing I want."

THE TILLERS

WATER

Funny and Otherwise

It isn't hard to meet expenses these days. As a matter of fact, you run into them every time you turn around.

The elevator girl had a word for everybody. "I'll bet you see some strange sights," she said to

the window washer.

"Yes, indeed," replied the man with the bucket, beit and sponges. "Why, there's an of-fice on the fourth floor where everybody's always working."

She waited at the corner, joyously—then pensively—then expectantly—then casually—then anxiously—and an hour passed.
"Man," she said, "is a brute, faithless and untrue, incapable of keeping a promise."

Two hundred yards down the street he said the same things about women. She was at the wrong corner.

Teacher (to tardy boy): "Why are you so late?" Boy: "Well, I always obey

the laws." Teacher: "Well just what do you mean?"

Boy: "There's a sign down the road that says, 'School ahead, go slow'."

Litle Betty was crying bitterly. Her mother asked her what the matter.

"My new shoes hurt me." "No wonder. You have them on the wrong feet," replied

Betty kept on bawling. "I haven't any other feet," she said.

PICNIC SAFETY

Meals eaten out of doors in the country taste twice as good as those eaten indoors but the picnic which includes a campfire can end in a costly and dangerous blaze unless care is taken to ensure that the fire is completely extinguished and that matches or Beautify your TV set with this smart new cover—easy to crochet in any size! Plain facts from young writers give frank reports on history

REGINA. - The children of Summerberry have put it down for all to see: The town has a "notable group of ladies," the television reception is just so-so, a lot of the local cows have Bang's disease, and in 1946 Pete Hewitt's garage burned down, writes Don Hanright for Canadian

The 20-odd school students at |

Written by a dozen different hands in cautious, easily-legible longhand, the Summerberry history is typical of hundreds which have or will be done this year as the school resultations. the school population's special contribution to the province's golden jubilee celebrations. Wide participation

More than 4,000 schools in the province were expected to participate in the program. Although most histories will be written in longhand, several already have come off commercial presses and others have been typed and mimeographed.

From the thousands of pages of copy produced, school superintendents will cull those most valuable to the general history of the province and these will be put on microfilm by the provincial archivist, Dr. F. E. Thomas, and his staff.

Most of the histories open in the ame way-"Our town is situated same way—"Our town is situated in the heart of the greatest wheat belt in Canada" and "it is here that our story begins." Then they plunge into a chronological heap of facts and figures on churches, auto dealers, pool halls, and a cow decapitated by the morning train back in 1913.

The 20-odd school students at Summerberry, a typical Saskat-chewan farm town 75 miles east of Regina, included these and other snippets in a scrapbook-style history of their community. The high school students at

"Terrifying sport"
They explain that this "terrifying sport" is known far and wide and still is carried on, despite objections of humane societies and observed. cieties and charges of crueity. It begins with a local pooch standing before a barrel awaiting the exit of a scrappy badger.

"The badger invariably outwits the dog," the students say, but the outcome is never certain and "we have never heard of any backers becoming rich overnight."

The youngsters at Macklin, near

the Alberta border due west of Saskatoon, boasted of their junior hockey players, including Clar-ence Campbell, now president of the National Hockey League.

Kerrobert, about 60 miles southeast of Macklin, notes that one of the local belies still totes around the buckshot she suffered in a Hallowe'en escapade back in 1938 but, except for this and a few suicides, "the town was moderate-ly free of lawlessness other than the common assaults as in any common family."

The pioneers at Main Centre village 120 miles west of Regina, told their fledgling interviewers that the first-comers were trou-bled by descendants of the coureurde-bois who "disagreed with set-tlers and shot cows instead of

The students take special pains to point out that Main Centre's homebrew whisky in those days was used strictly as a cure-all, never as an intoxicant.

This lighter vein runs through all the histories, but the students generally went to great lengths in presenting the factual, concise story of their communities' development.

opment.

Commented one teacher: "Once every 50 years is often enough for this sort of thing."

Other golden jubilee events in the schools included province-wide CBC broadcasts on Saskatche-way," history, and a special halfwan's history, and a special half-hour musical program during which more than 150,000 school children sang together over a com-

-By Les Carroll

Many things are as broad as they are long. But highways are not among these. And the driver who forgets this may find himself in a spot four feet broad and seven Town And District feet long. He has passed his last car and become a digit in the staggering fatality statistics that are

spiralling higher each year. This waste of life has become a problem for more than traffic officers and safety bodies. Sociologists and psychologists now strongly suspect that safety-on the road or elsewhere-is comprised of something more than following all the rules in the book. They are discovering that the man behind the wheel, working over a machine or on a step ladder is the same man who every day per forms a set of social conventions, goes home every night and generally gets seven hours sleep in each 24 hour cycle. In other words, they are finding that the man behind the wheel, over the machine or atop the ladder behaves in the same manner as he does in his daily social intercourse. He doesn't change. The bully in the house is a bully at the cantrols of his car; the man who panics in the presence of strangers, panics when something goes wrong with his machine; the man who "freezes" at the slightest threat should keep off the ladder.

The real solution isn't in chang ing the highway, machine or step ladder. It lies in changing the man, The habitually discourt-eous man is no less ill-mannered when hapless pedestrians find themselves trapped in his car's path or when the driver shead of him chooses to stay within the speed limits determined by law. Nor does the easily frightened or excitable man become poised, assured and fearless in the presence of danger. To save lives, we will have to change lives.

From this research another important factor has emerged. Pre-occupation is a deadly menace. The daydreamer-at home, at work or in his car-may day dream himself into eternity. While it is difficult to determine just what percentage of mishaps originate with pre-occupation, researchers haven't much doubt that it accounts for the largest portion of accidents. Here, too, it is the personal aspect that comes into prominence, for a man is only as safe as his personal security. So, too, the bothered motorists. His motto should be: the more worry the less speed.

While gigantic strides have been taken in the past two decades to eliminate scores of what were once major safety menaces, there is no place for super-opti-

WEEDS OF THE PRAIRIES "AN ILLUSTRATED GUIDE"

This Department is privileged and pleased to announce the publication of a new revised edition of its weed bulletin, entitled, "An Illustrated Guide to Prairie Weeds". Although this bulletin has already been distributed to 80,000 farmers, rural school teachers and pupils, agricultural students, 4-H Club members and others, there is still a widespread demand, particularly from the young farm people of Western Canada, for adequate and reliable information on the common weeds of the prairies. It is in response to this important and continuous demand that a Third Edition of the weed bulletin being published at this time,

The first step in any effective weed control program is the correct identification of the weed or weeds to be controlled. Thus the main purpose of the weed bulletin is to make available to western farmers information that will help them to identify the weeds they are most likely to find on their own farms.

More than 60 common prairie weeds, and their seeds, are illustrated and described, and brief mention is made of many others. In describing the weeds, the use of technical terms has been avoided wherever pos-sible. We feel that the great popu-larity of this weed bulletin lies in the fact that it is well illustrated, and written in non-technical lan-guage. The revised Third Edition is published with the hope that it will assist farmers, and young farm people particularly, note only in identifying weeds but in learning more about their habits of growth, methods of reproduction, and the best methods of combating them. and written in non-technical lan-

Copies of "An Illustrated Guide to Prairie Weeds" are available to farmers, free of charge. They may be obtained from local grain buyers of any of the elevator companies listed above, or by writing to Line Elevators Farm Service, Winnipeg or Calgary.

According to the law, Canada's family allowance payment must be spent exclusively for the maintenance, care, training, educa-tion and advancement of child-

"1955" is Alberta's Golden Anniversary year. It was in 1905 that this territory joined Canada as a province. Now Alberta is recognized as a region with as bright a future as any of the provinces which go to make up the Dominion of Canada.

Agriculture has made the greatest contribution to the economic advancement of Alberta, and the Alberta Wheat Pool pays tribute herewith to the men and women engaged in that great industry.

Within the space of a single generation the enterprising and energetic farm people of Alberta have created a record of diversified production of quality food products which is unsurpassed by any other province.

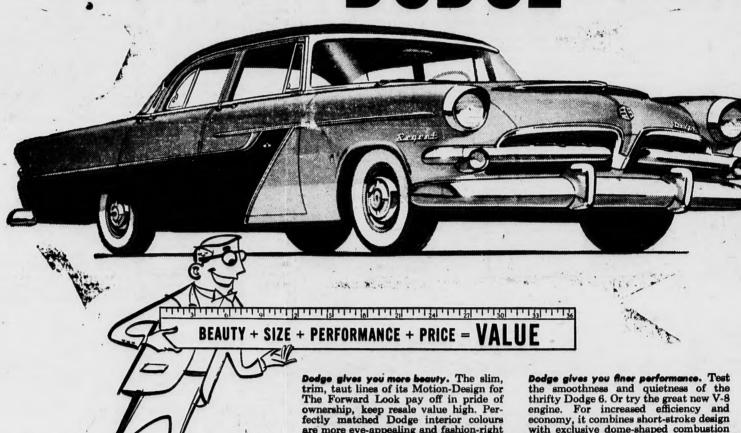

The wealth produced by Alberta farmers has permeated the economy of the province to a greater extent than all other sources of wealth combined. It sustains the village, towns and cities and provides the basis for employment for most Alberta people.

Agriculture provides the most freight for the railways and other forms of transportation, the main source of raw materials for Alberta manufactories, and a constant inward stream of wealth from the substantial annual exports of food to other parts of Canada and other nations.

While Alberta people celebrate the province's Golden Anniversary they should keep in mind the immense contribution made by the people on Alberta farms to the prosperity and progress of this growing province.
